RE: Draft 1,4-Dioxane Groundwater Sampling Report (MAFB Sites)
McConnell Air Force Base

Dear Mr. Knight:

The Kansas Department of Health and Environmental/Bureau of Environmental Remediation (KDHE/BER) has reviewed the above referenced document, received on February 21, 2018. KDHE/BER has the following comments:

1. **General comment:** Regarding the two detections of 1,4-Dioxane exceeding the USEPA Regional Screening Levels (RSLs) at monitoring wells SS544-MW45S and ID-636-MW01, these wells should be resampled periodically to verify concentrations and, consequently to determine a downward trend in concentrations.
2. **Table 4-16:** The year of the USEPA RSL and KDHE RSK screening values should be included under the notes section.

If you have any questions, please contact me by phone at (785) 291-1682 or by e-mail at jesse.saegert@ks.gov.

Sincerely,

A handwritten signature in blue ink that reads "Jesse Saegert".
